Full Stack Developer | Flutter & Mobile App Developer | Laravel, PHP, JavaScript & Web Development

PROFESSIONAL SUMMARY

Full Stack Developer and Flutter Mobile App Developer with 8+ years of experience building and deploying web and mobile applications for national and international clients. Skilled across the full development lifecycle — backend, RESTful APIs, frontend, databases, and mobile deployment — using Flutter, React Native, Laravel, PHP, and JavaScript. Strong background in Agile workflows, team leadership, and client communication.

CORE SKILLS

Mobile App Development: Flutter (iOS & Android), React Native (Expo), Cross-Platform App Development, State Management, Firebase, Push Notifications, App Store/Play Store Deployment

Full Stack Web Development: JavaScript, PHP, HTML5, CSS3, jQuery, Bootstrap, Laravel, WordPress

API & Backend: RESTful API Development, Web API Design, Entity Framework Core, Fluent Validation, CORS Policy, Microservices Concepts

Database: SQL Server, MySQL, Complex SQL Queries, Stored Procedures, Triggers, Indexes, Views, Database Design

Tools & Practices: Git, GitHub, Version Control, Team Leadership, Code Review, Bug Fixing & Debugging, Client Communication

PROFESSIONAL EXPERIENCE

Full Stack Developer — Electro7 Technologies

Nov 2022 – Present

United Arab Emirates

- Own end-to-end delivery of web and mobile software solutions as a Full Stack Developer, managing the complete development lifecycle from architecture and backend development through frontend implementation and production deployment.
- Develop cross-platform mobile applications using Flutter, building responsive, high-performance UI and integrating REST APIs for real-time data across iOS and Android.
- Lead and mentor a development team of engineers, assigning tasks, conducting code reviews, and coordinating sprints to meet project milestones on schedule.
- Manage deployment processes and release activities, ensuring smooth, low-downtime product rollouts.
- Identify, debug, and resolve application issues across the stack to maintain system stability, performance, and reliability.
- Conduct client requirement-gathering meetings, translating business needs into technical specifications and scalable software solutions, including hardware-integrated mobile features.

Full Stack Developer — Media Plus LLC

Nov 2020 – Oct 2022

United Arab Emirates

- Built and shipped user-friendly cross-platform mobile applications using React Native (Expo), focusing on performance optimization and UI/UX consistency.
- Diagnosed and resolved bugs and performance issues within mobile applications to maintain stability across releases.
- Developed, upgraded, and maintained multiple production websites using JavaScript, HTML5, and CSS3, following consistent coding standards and structure.
- Collaborated cross-functionally with designers and management to deliver innovative, business-aligned web and mobile solutions, providing technical guidance directly to clients.

PHP Developer — Sekurus International LLC

Sep 2019 – Oct 2020

Pakistan

- Built and maintained B2B and B2C websites using PHP, supporting business-critical operations.
- Monitored and updated a tracking portal to reflect real-time operational status.

- Developed and exposed APIs consumed by mobile app developers, improving cross-team development efficiency.
- Fixed defects on existing websites and implemented performance optimizations, improving site speed and reliability.
- Participated in weekly IT team meetings to track project status and align on development priorities.

MVC.NET & PHP Developer — Awantech

May 2017 – Aug 2019

Pakistan

- Developed web applications using ASP.NET MVC5, ASP.NET Core 3.1, and .NET 5.0, including full-stack feature delivery and Web API development.
- Implemented Entity Framework Core (Code First and Database First) for data access layers, with Fluent Validation and CORS policy configuration.
- Wrote complex SQL Server queries, stored procedures, triggers, indexes, functions, and views to support application logic.
- Created RDLC and Crystal Reports, integrating reporting tools directly with SQL Server data sources.
- Built responsive frontends using HTML, CSS, Bootstrap, JavaScript, jQuery, and AJAX/JSON for dynamic data binding.

PHP Developer Intern — Civil Aviation Authority

Aug 2018 – Oct 2018

Software Developer Intern (.NET) — Viftech Solutions

Oct 2016 – Jan 2017

Freelance Website Designer & Developer — Fiverr

2015 – Present

- Design and develop custom client websites tailored to specific business requirements, independently managing multiple concurrent projects.
- Communicate project progress clearly to both technical and non-technical stakeholders to ensure on-time delivery.

KEY PROJECTS

Vor7 Suite — Fleet, Driver, Inspection & Parent Tracking Apps (Flutter)

Built a connected suite of four Flutter mobile apps for fleet management: vehicle service/maintenance reporting, driver task assignment and routing, passenger check-in/inspection, and real-time parent-facing school bus tracking with live ETAs.

WMS NexusFlow — Waste Management System Application

Built a waste management app with RFID scanning for worker routing and garbage collection record-keeping.

AlKhoory — Cargo Management Application | Labeeh — E-commerce Application

Developed a cargo tracking/logistics application and a separate e-commerce platform supporting product browsing, ordering, and transaction management.
